- 10Gb ($50 a month for each additional 10GB, available on request, not dynamic)

Key Benefit:
- Economocial, better than your average hosting
- Dedicated resources & management, increased speed and security.

About
Hosting

What is Hosting?

In order to carry on domestic activities and be contacted by the outside world, you need four walls and an address. In this over-baked metaphor, hosting is the property, the electric and plumbing that connects your infrastructure to the outside world. More simply, web hosting is renting or buying space to host a website on the web.

It's easy to find a web host with thousands of different services available. Web hosting plans range from free with limited features to expensive services specialized for business. The plan you choose will depend primarily on your website goals, for example, the type of amount of traffic, the complexity of your digital infrastructure, security and safety and more.

Do I need it?

If you plan to be a part of the glorious thing we call the world wide web, hosting is an essential service. What type of service you require is based on your specific needs.

Why our Hosting Services?

It is our belief that high-quality hosting means three things: speed, security, and service. Let's face it; we live in a world where things go sideways: hacks, downed servers, you name it. The best hosting is one you're never aware of. To support the lofty goal, we use best-in-class servers built for WordPress sites. This is hosting built for business owners.

We take daily backups of your website for increased security. We serve up every website on a content delivery network, so you never have a slow moment. Finally, we make it so you can switch at any time, with no strings attached.

What to Expect

Access
You will receive a login to your hosting account, but be wary of spelunking too deep; a slip-up can cause web-related issues! We can also grant access to your network of developers.

Billing
To prevent spam invoicing, we bill for hosting services quarterly. *There is a 5% per month late fee.*

Support
Having an issue? BS is committed to helping you with your web-related issues. Support that is not a system issue will be resolved at our hourly rate. If you have Premier Web Support, we will complete your support needs within 24 hrs. Regular support requests will be completed on a ticketed basis, and timelines will be communicated with your team.
